

WARM & COOL WATER DIETS

DIET	FEED SPECIFICATIONS										RECIRC READY	Feed Size Comparison								
	Sinking (mm)					Floating (mm)						Optional	PRODUCT FEATURES							
	3.0	4.0	6.0	8.0	10.0	3.5	4.5	5.5	7.5	9.5			mm	1.0/1.5	2.0/2.5	3.0/3.5	4.0/4.5	5.5	6.0/7.5	8.0/9.5
Crude Protein (%)	Crude Oil (%)											Inches (approximate)	1/16	3/32	1/8	5/32	3/16	1/4	3/8	
FRESH WATER	Classic Bass			48 18	48 18		48 18	48 18	48 18	48 18	48 18	✓	Classic Bass is a medium-energy diet specifically formulated for warm water species such as largemouth bass, hybrid striped bass, and barramundi.							
	Nova OP						48 17	48 17	45 18	43 19	42 20	✓	Nova OP is a medium-energy feed for largemouth bass and barramundi. This diet carefully monitors carbohydrate levels and uses a range of protein sources to ensure the correct mix of essential amino acids.							
	Nova LE						48 13	48 13	45 14	43 15	42 15	✓	Nova LE is a low to medium-energy feed for hybrid striped bass and barramundi. This diet incorporates various protein sources to ensure the needed nutritional amino acids and micronutrients are met.							
	Nova RD						48 13	48 13	45 14	42 15	42 15		Nova RD is a high energy diet formulated for red drum to improve their growth and performance, lower feed conversion ratio, and maintain superior fillet quality.							
	Sturgeon		42 18	42 18	42 18	42 18							Sturgeon is an extruded, medium-energy diet formulated to meet the amino acid and lipid requirements of sturgeon.							
	Koi Color						35 7		35 7				Koi Color is a premium high-quality diet containing fish meal, wheat germ, spirulina, vitamin E and the mineral rich montmorillonite clay to ensure a healthy and bright colored fish.							
	Pond LE						32 6	32 6	32 6				Pond LE is a low-energy floating feed for tilapia, catfish and other species with low protein and energy requirements. This feed continues to be a proven favorite for those seeking economic feeding regimes when utilizing the nutrients in the pond as a supplement.							
MARINE	Europa	55 15	55 15	55 15	55 15	55 15							Europa is a complete range of high-performance marine diets with excellent feed response and rapid growth.							
	Marine MX/MX-A				46 12	46 12							Marine MX is a high fishmeal, low-fat diet for marine species such as totoaba and snapper. Marine MX does not contain any land animal proteins. Marine MX-A contains land animal proteins.							
	Optima YT	46 16	45 17	43 18	41 20	38 22							Optima YT is a highly palatable sinking diet for Seriola species that promotes an excellent feeding response. It contains high levels of protein with highly digestible ingredients.							

- Koi Color and Pond LE are available in 40 lb. bags can be bought online at; www.skretting.us
- Floating diets available in 40 lb. or 2000 lb. bags.
- Sinking diets available in 50 lb. or 2200 lb. bags.

Our mission

feeding the future

We are focused on doubling our aquaculture feed production and halving our footprint by 2050.
