

ORI-N3

Algal based enrichment for *Artemia*

ORI-N3 is an innovative algal based DHA enrichment for *Artemia*. *Artemia* are notoriously difficult to enrich with DHA, having the ability to break it down to EPA almost as fast as it is ingested.

ORI-N3 is an innovative algae blend of high DHA algae allowing maximal uptake of DHA into the *Artemia* in a very flexible and convenient manner. Dosage and enrichment time can be tailored to best suit operational and nutritional requirements.

ORI-N3 is free from fish oils resulting in a cleaner, more natural and sustainable enrichment.

Composition and ingredients

Moisture	Proteins	Lipids	n-3 HUFA	DHA/EPA
68%	3.5%	17%	90mg/g	>35

Please refer to label for detailed product composition.

Use

- Mix the required amount up to 100grams of **ORI-N3** per litre of water for 10-30 seconds until dispersed using a blender.
- Use dosage between 400-750mg/l every 12 hours.

Storage & Packaging

ORI-N3 has a shelf-life of 12 months from date of manufacture and should be stored in a refrigerator. Once open, **ORI-N3** should be utilised within 1 month and kept sealed in a refrigerator. **ORI-N3** is packed in 2kg food grade alufoil pouches.
