STARTER FEED	Starter Crumble	52 16	52 16	52 16																							✓	Starter Crumble is a nutrient-rich starter feed suitable for trout, steelhead, and a range of other cold, cool and warm water species. It is formulated as a high digestible & high protein diet.		
	FRY FEED	Classic Fry											45 16	45 16														✓	Classic Fry is a medium-energy diet. It has been specially formulated to achieve good growth and health of fry.	
Oncor Fry					47 17	46 18							47 17	46 18														✓	Oncor Fry has been formulated to ensure good water quality, excellent growth, and low feed conversion ratios. It has a higher level of digestible protein and energy than Classic Fry.	
GROWER FEED	Classic Trout						40 12	40 12	40 12	40 12									40 12	40 12	40 12	40 12	40 12					✓	Classic Trout is a low-cost, low-energy diet for moderate or controlled growth.	
	Extruded Steelhead						45 16	45 16	45 16	45 16									45 16	45 16	45 16	45 16	45 16					✓	Extruded Steelhead is nutritionally balanced for cold water species and provides fast growth.	
	Steelhead MB						45 16	45 16	45 16	45 16									45 16	45 16	45 16	45 16						✓	Steelhead MB is formulated to meet the same proximate specifications as Extruded Steelhead and offers equal fish performance, but allows for increased raw material flexibility.	
	Oncor						45 19	44 20	41 22	40 23									45 19	44 20	41 22	40 23						✓	✓	Oncor is a medium-energy, floating or sinking diet that has been designed to meet the changing requirements of trout and steelhead as they grow as reflected in oil and protein content.
	Optiline Trout																			45 23	42 24	41 25	39 25	37 26					✓	Optiline Trout is a high-energy, high-performance diet for trout and steelhead reared in freshwater. It has been designed to give the lowest cost of fish per pound by promoting excellent growth rates and low feed conversion ratios.
Extruded Salmon				45 19	45 19	45 19	45 19	45 19	45 19																		✓	Extruded Salmon is ideal for Pacific salmon. Fishmeal and fish oil are incorporated at optimal levels to help ensure healthy fish and pellets are extruded to promote stability in water.		
SPECIALTY FEED	Classic Brood								46 12	46 12	46 12								46 12	46 12	46 12						Standard	Classic Brood is a high oil and high digestible protein diet. This diet will ensure higher fecundity, hatching rates and fry survival. This diet should be fed for 12 months prior to spawning.		
	Protec Trout	52 16	52 16	52 16	47 17	46 18	45 19	44 20	41 22	40 23									47 17	46 18	45 19	44 20	41 22	40 23			✓	✓	Protec Trout is our most advanced feed formulation. It supports the immune system, increases the fish's antioxidative capacity, increases feed intake, supports gut health and, increases the availability of nutrients. The diet should be fed prior to and during stressful events.	
	Oncor HT													46 18	45 19	44 20	41 22	40 23									✓	Oncor HT helps maintain feed intake during periods of elevated temperature to encourage fish growth and lower feed conversion ratios.		

- Starter Crumble 50 lb. bags, Classic Trout and Classic Fry 40lb. bags can be bought online at; [www.skretting.us](http://www.skretting.us)
- Specialty feeds are subject to minimum order quantities when product is not in stock.
- The formulation of our diets changes with increased pellet size to correspond with fish growth.
- Floating diets available in 40 lb. or 2000 lb. bags.
- Sinking diets available in 50 lb. or 2200 lb. bags.

## Our mission

feeding the future

We are focused on doubling our aquaculture feed production and halving our footprint by 2050.
