

NC Sea Grant: Coastal Resilience Team Competition Request for Proposals

Purpose:

North Carolina Sea Grant (NC Sea Grant) is accepting applications for the inaugural **Coastal Resilience Team Competition**. This program provides an opportunity for **teams** of North Carolina-based graduate and undergraduate students to conduct projects that will lead to more resilient habitats and communities within the NC Coastal Plain. Project teams must conduct objective/hypothesis-based research that addresses one or more of the following broad focus areas (in no order of importance):

- **What are the impacts of higher groundwater levels on forest, agriculture, and community infrastructure?**
- **How will changing precipitation patterns impact salinity levels in estuarine systems?**
- **How will SAV communities in NC respond to higher temperature?**
- **How can coastal communities engage underserved populations to better prepare them for future disasters?**
- **What aquaculture practices can be utilized to buffer the industry against disasters?**
- **How will the economic costs of climate change impact NC coastal communities, and how will different sectors and populations be affected?**
- **Additional research topics that address becoming more resilient to the impacts of climate change in coastal NC will also be considered.**

We **strongly encourage** proposals from Historically Black Colleges and Universities, Minority Serving Institutions, and/or students from traditionally underserved and underrepresented communities, as well as from project teams that can demonstrate how their work and related outreach will benefit underserved and underrepresented communities.

Proposed work should relate to:

- One of more of the above focus areas;
- NC Sea Grant's Strategic Plan (go.ncsu.edu/Sea-Grant-Plan)
- NC Sea Grant's commitment to diversity, equity, and inclusion (go.ncsu.edu/DEI)

North Carolina Sea Grant is a multi-campus program within the University of North Carolina system and is part of the national Sea Grant Network (www.ncseagrant.org).

Project Teams/Eligibility

Project teams should be based around at a minimum a two-member team made up of a **Graduate Student lead**, and an Undergraduate participant. Teams may contain additional students, up to a maximum of 4 students. The additional team members may be either graduate or undergraduate students. Only graduate students in good academic standing, attending an accredited North Carolina university or college are eligible to apply. Team members do not have to be located at the same institution. The role of each team member must be clearly outlined as part of the application (see below). NC Sea Grant expects team leads will be later-career graduate students

NC Sea Grant: Coastal Resilience Team Competition Request for Proposals

to ensure they have the experience needed to oversee the project team and ensure the project is completed

Deadline: October 29, 2021 at 5pm local time.

Award Overview:

- One to two project teams are expected to be funded out of this competition; subject to the availability of funds and the quality of the received applications.
- The performance period will be January 4, 2022 through December 31, 2024.
- NC Sea Grant will provide the winning team/s up to \$10,000 per year for the duration of the project (\$20,000 total funding available per team project).
- Funding will be channeled to the project team members via **student stipends**. How the total stipend amount is to be distributed among the team members is up to the Graduate Student lead. This data should be included on the title page (see below).
- Funding for year 2 is dependent upon successful execution of year one (see reporting requirements below) and NC Sea Grant's receipt of additional federal funds. Year 2 is not guaranteed.
- It will be incumbent upon the Graduate Student lead to ensure the project is completed and that each participant completes their portion.
- It is incumbent on the applicant team to obtain all additional institutional (e.g. IRB), state, and federal permits required for conducting the project.

Application Requirements:

All applications must include the following elements.

- A research proposal (described below).
- A current curriculum vitae (CV) for each member of the project team, limited to 2 pages per CV.
- The lead graduate student's major professor must provide a letter of support outlining the student's qualifications and abilities to undertake/oversee this team project.
- A data management plan, limited to 2 pages.

Research Proposal Format:

To apply, project teams must prepare a proposal. The proposal should be in 12-point, Times New Roman font, with 1-inch margins. Proposals must contain items 1-7. The title page should be the only thing on page 1. **Items 2-7 must not exceed 5 pages.**

1. **Title Page:** The title page should include the following aspects.

- List project title.
- List all project team members including full contact information.
- Document the stipend amount that each participant is to receive.
- Clearly identify the project team graduate student lead.

NC Sea Grant: Coastal Resilience Team Competition Request for Proposals

- Provide the name and contact information of the graduate student lead's major professor.
- 2. **Description** of the project including background rationale, relevance of the project to the RFP resilience focal area(s) listed above, **objectives/hypothesis** being tested, and alignment with the funding program's interests as noted above.
- 3. **Materials and Methods**.
- 4. Clearly defined **Tasks** and a **Timeline** to complete the tasks.
- 5. **Roles**: Clear description of the roles/activities each project team member will oversee/conduct. Also include a description of how you plan to maintain communication among the team members during the course of the project.
- 6. A well described **Outreach/Dissemination Plan**. Who would be interested in the results of this work and how do you plan to share the results of this work to them?
- 7. A brief explanation for how the stipend money will be used in support of the project.

The proposal may contain a **Literature Cited** section after item 7 above as needed. This section is not included in the page limit.

Up to two additional **stakeholder letters of support** from end-users, and other appropriate parties may be included if they enhance the application.

Submission:

The Graduate Student lead should prepare and submit the application. Application materials must be received **by 5 p.m. on Friday, Oct. 29, 2021. Applications will only be accepted through the eSeaGrant portal.** This portal can be accessed at: go.ncsu.edu/ncesg. The portal will walk you through submitting all required elements of the proposal. Incomplete or late applications will not be eligible. The portal will automatically close at the deadline.

Review Process:

The review panel will be co-chaired by Sarah Spiegler and John Fear of NC Sea Grant. Additional participants will include in-state topic experts. Proposals will be ranked based on their relevance to the identified focus areas (see list above), quality of the proposed science, and adherence to the instructions provided in this request for proposals.

Reporting Requirements:

- 6-month progress reports are required.
- A final report is required prior to the end date of the performance period.
- The winning team/s will also be asked to present their findings to the NC Sea Grant advisory board.
- The winning team/s will also have additional opportunities to disseminate their findings through engagement and product development with NC Sea Grant's communication team.

NC Sea Grant: Coastal Resilience Team Competition Request for Proposals

The 6-month progress reports should be submitted to Sarah Spiegler and John Fear via email. The final report will be submitted along with other required reporting metrics into eSeaGrant by the student at the end of the performance period.

Dr. Fear will assist the student with the eSeaGrant reporting access in the last month. The lead graduate student's major professor must agree to ensure all Sea Grant reporting requirements are met.
